RE: **GENETIC ENGINEERING**

Dear Sir/Madam:

I would like to tell the FDA:

1. All genetic engineered foods and food ingredients should be labeled so that the public is informed and has a choice.
2. Genetic engineered foods should not be presumed to be safe and should be subject to mandatory, pre-market safety testing.
3. There should be a moratorium on genetic engineered foods until long-term studies show they are safe for human health and the environment.

Sincerely,

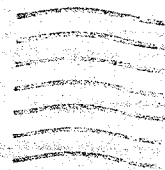

Ursula Zepralka
